

Statement of Purpose for a Two-Month Internship at IIT Madras

I am Ch. Mohitha, a third-year undergraduate student pursuing a Bachelor of Technology in Information Technology at Vignan's Institute of Engineering for Women. I am writing this Statement of Purpose to express my keen interest in pursuing an internship at the Indian Institute of Technology Madras, an institution renowned for its academic excellence, innovative research, and commitment to technological advancement.

During my academic journey, I have developed a solid foundation in programming languages such as Java and C, along with web technologies including HTML, CSS, and JavaScript. I also possess working knowledge of SQL, which has helped me understand database management, data handling, and query optimization. In addition, I actively use GitHub to manage and showcase my projects, practice version control, and collaborate effectively. I have also explored core theoretical subjects like Computer Networks and Operating Systems, which have strengthened my understanding of how computing systems function at both conceptual and practical levels. Beyond academics, I continuously work on improving my technical skills through mini-projects and self-learning.

I am particularly interested in gaining hands-on experience in real-world research environments where I can apply my theoretical knowledge to solve practical challenges. An internship at IIT Madras would provide me with exposure to advanced research methodologies, cutting-edge technologies, and mentorship from distinguished faculty members. I am eager to learn from experts, collaborate with talented peers, and contribute meaningfully to ongoing research or development projects.

My goal is to deepen my technical expertise, enhance my problem-solving abilities, and prepare myself for higher studies and a research-oriented career. I strongly believe that this internship will help me develop analytical thinking, teamwork, and professional ethics while allowing me to understand the standards of excellence upheld at IIT Madras.

I am a quick learner, adaptable to new environments, and committed to continuous improvement. Given the opportunity, I assure you that I will dedicate myself fully, contribute sincerely, and uphold the values and expectations of IIT Madras.

Thank you for considering my application. I look forward to the opportunity to learn and grow through this internship experience.

Sincerely,
Ch. Mohitha.
